

1. Open the application

2. upload link any(Json or yaml)

- click on import and validate (applicate will validate the file and import it if it is correct)

localhost:5173

Testleaf API Testcase Generator

— SWAGGER — QUALITY TEST COVERAGE

Generate reliable API testcases from Swagger

Upload, validate, generate, review, and export — through one controlled Testleaf-themed workflow.

AI-powered ✓ Spec-grounded Postman & Excel export

• Swagger link imported and validated successfully.

— STEP 2 — Valid Specification

Validated

swagger.json

OpenAPI 2.0	Errors 0	Warnings 0
----------------	-------------	---------------

Proceed to generate testcases

- Now click on “Proceed to generate testcases” and testcases will be generated

localhost:5173

af API Testcase Generator

• 3 API testcases generated.

— STEP 3 — Grog LLM - OpenAI/Gpt-Oss-120b Clear

Generated API testcases

Grounded in the validated OpenAPI operations and schemas.

Total Testcases 3	Positive 2	Negative 1
----------------------	---------------	---------------

Search ID, endpoint, method, or title

All scenarios All testing categories

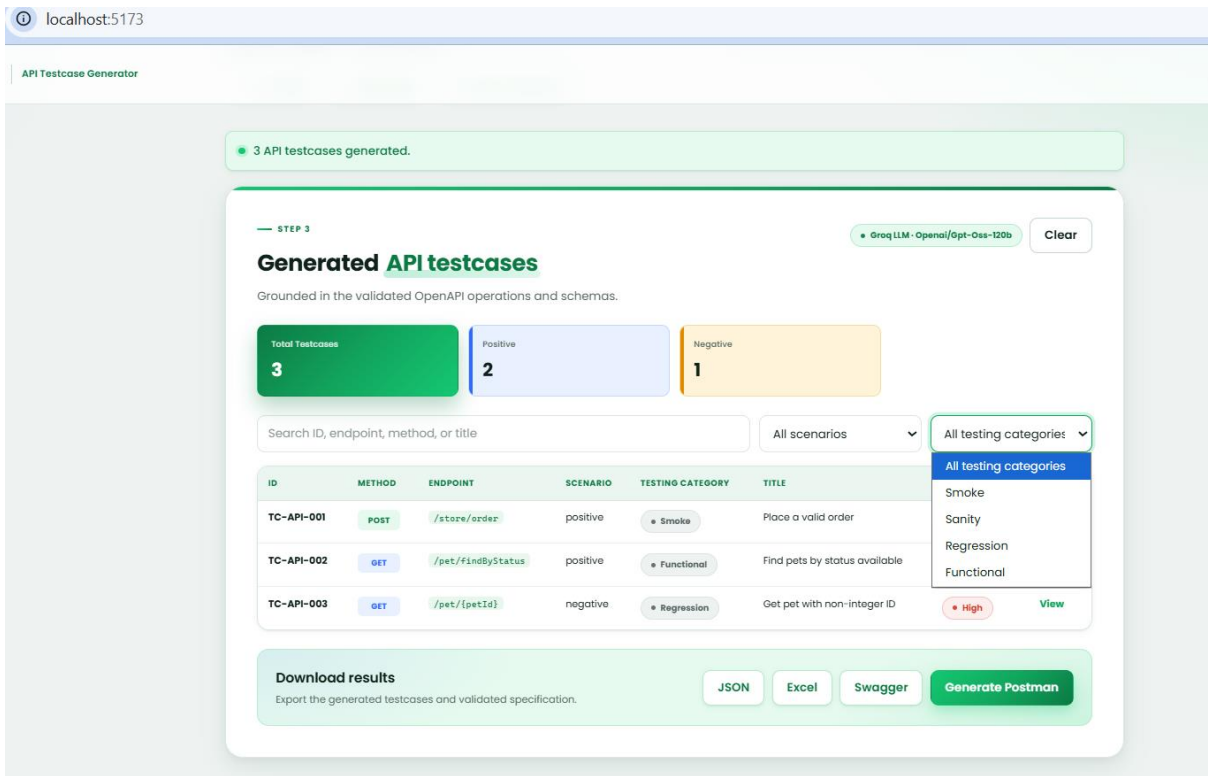

ID	METHOD	ENDPOINT	SCENARIO	TESTING CATEGORY	TITLE	PRIORITY	STATUS
TC-API-001	POST	/store/order	positive	• Smoke	Place a valid order	• High	View
TC-API-002	GET	/pet/findByStatus	positive	• Functional	Find pets by status available	• Medium	View
TC-API-003	GET	/pet/{petId}	negative	• Regression	Get pet with non-integer ID	• High	View

Download results

Export the generated testcases and validated specification.

JSON Excel Swagger Generate Postman

5. Here we can see that there is dropdown for “ALL TESTING CATEGORIES”

6. If user select “Smoke” only testcases related to smoke category will be displayed
